## About Me

---

I'm an industrial engineer **passionate about software development**, with a focus on product management of software-oriented solutions. **I pride myself in my problem-solving skills**, tackling complex issues and developing effective and ingenious solutions. This is coupled with **my ability to learn rapidly, adapt to new technologies**, and a great curiosity for understanding the intricacies of software development. I also enjoy cross-cultural contexts, having had the opportunity to work in **international projects** in my time in both NTT Data and Vonzu Tech.

My commitment, determination, and enthusiasm for software-oriented solutions have been essential in driving the success of the projects I have been part of. **I thrive in environments where project management and product management intersect**, allowing me to bring value both as a consultant dealing with the client and as a product owner defining and delivering the project's critical points.

I also **develop my own apps in my free time** - don't hesitate to reach out to discuss any potential opportunities or collaborations!

## Work Experience

---

### Product Owner at Vonzu Tech

May 2023 - Currently

Assumed a more direct control of the product development team after successfully managing high stakes projects. Definition of key new product features oriented towards strategic company growth while still managing and delivering critical projects to the company's 2 most valuable clients.

*MERN Stack · User Experience · SaaS B2B Development · Sprint Planning · Agile Methodology · Jira · Atlassian · Confluence · Miro · Cloud software · AWS*

### Project Manager at Vonzu Tech

Dec 2021 - April 2023

Started as Customer Success support to the operations team in Vonzu Tech, SaaS provider of Last Mile Delivery solutions. I quickly gained knowledge of the software and grew very confident in dealing with clients. One month in I started handling and managing projects myself, working closely with the product development team to communicate the project's requirements and oversee the delivery of new features.

*Data analysis · Decision Making · Project Management · B2B Client Management · Budgeting · User Experience · IT · Integrations · Functional analysis · Product design · Conflict resolution · Communication*

### Solutions Assistant at Everis (NTT Data)

Apr 2021 - Aug 2021

After a successful internship, I assumed a full-time role as Solutions Assistant, continuing to work in the same project with Cellnex. My language and communication skills stood out and my superiors were confident in me participating in meetings with stakeholders in both English (Ireland) and French (Switzerland) on top of my daily responsibilities.

### Solutions & Delivery Intern at Everis (NTT Data)

Apr 2021 - Aug 2021

Part of the functional team on a project with telecommunications company Cellnex, focused on developing a web tool that standardizes the workflow for acquisition, negotiation, and provisioning of sites across multiple European countries for the construction and implementation of 5G antennas.

**Administrator** at Blotor 2007 SL**2017 · Currently**

Management of a 100 kW solar energy (power) plant, including tasks involving production control by checking whether outcome meets actual radiation. Efforts made in developing new techniques for improving the plant's efficiency, along with its financial management. Part-time job. Self-employed.

**Private tutor****2015 · Currently**

Private tutoring for students aged 16 - 18, reinforcement classes for the International Baccalaureate Bilingual Diploma, the Spanish Baccalaureate and University Entrance Exams. Part-time job. Self-employed.

**Basketball coach****2012 - 2014**

Coach of the Male U11 Basketball team at Aula Escuela Europea as part of the International Baccalaureate course.
